Product Benefits:

Plinth Lock acts as a strong stabilising system which keeps plinths in place for years to come.

Usually plinths can get knocked with mops, vacuums and even accidentally kicked (which is why they sometimes get called kick boards) creating unsightly gaps which can make you new or old kitchen, Bathroom and Bedroom plinths look tired and in poor condition.

By using Plinth lock all plinths are held rigid with no room for movement. Plinth lock is easy to install and creates the perfect professional expert fit to new and existing kitchens, Bathroom and Bedroom installations .
